[How To Divide In Dev C](#)

FUNCTIONS

1. Using functions, create a program that displays the following menu for the food items available to take order from the customer:
 - B - Burger
 - F - French Fries
 - P - Pizza
 - S - SandwichThe program inputs the type of the food and quantity. It finally displays the total charges for the order according to following criteria:
 - Burger = 200
 - French Fries = 50
 - Pizza = 500
 - Sandwich = 150
2. Program to make a simple calculator to Add, Subtract, Multiply and Divide using functions.
